SUMMARY

I am an Experienced Software Engineer, skilled in app development Familiar with SDLC (waterfall & Agile) Love to Code in C#, Java, Python , and Matlab I Have so much interest in Engineering and Science.

EDUCATIONS

Bachelor of Engineering - Institut Teknologi Kalimantan	Balikpapan, East Borneo	Aug 2017 Graduated
---	-------------------------	-----------------------

PROFESSIONAL SKILLS

C#, Java, Python, R, Node. JS, Matlab
Asp .Net, Webform, MVC, .Net Core, Springboot, Maven
REST API, GRPC, SOAP
SQL Server, Postgres SQL, MongoDB
Tableau, Google Data Studio, Tableau Server, Tableau Prep
Katalon, Selenium, JMeter
GIT, Docker, AWS, Jenkins, JIRA, Confluence

EXPERIENCES

VLink Consulting Senior Software Engineer in Bank Mandiri - Optimized payout settlement batch scheduler, reducing processing time from >1 hour to under ~1 minute for ~155,000 records by resolving bottlenecks and improving query efficiency. - Developed multi-outlet, multi-account registration feature, enabling merchants to manage multiple outlets with distinct bank account linkages. - Enhanced code quality and maintainability by resolving SonarQube issues in alignment with internal engineering standards. - Delivered enhancements to inventory, catalog, and promotion systems across POS, webstore, and kiosk platforms. - Reverse-engineered complex legacy pricing logic to enable implementation of new promotion and inventory features aligned with evolving business requirements. - Led backend development for POS payment revamp, coordinating system integration and improving payment processing reliability. Tech Stack: .NET 8, C#, Java, Maven, SQL Server, PostgreSQL, GRPC, Rest, Kafka, Redis, ASP.NET Web Forms	May 2025 - Present
--	---------------------------

SILOAM INTERNATIONALS HOSPITALS Fullstack Developer – Scrum Master’s Payment System • Responsible as Scrum Master’s Payment System in Patient Administrations Tribe. • Responsible to Develop and maintain services related to Core Application (HOPE) for other systems to integrated. - Develop Stored Procedure mirroring features from HOPE. - Develop New Services (.Net Core 2.x and .Net 6.0) from HOPE. - Migration Hosting from IIS to Linux Based Server On Premise. - Migration DB, Stored Procedure, DB Jobs, Apps Services to AWS. - Re-Architecture SOFAS Sevice (Feed data to Rate Hospital Service by the patient) and Feeding Document Management System (DMS) data to DMS Portal. • Responsible to Develop and maintain All related Payment System in Siloam Hospital. - Support and Develop Payement Gateway (midtrans and nobu). - Payment System integrations for Doctor Rating, Medical Checkup, Self Payment, Prepaid Medical Rehab, Self Checkout, CMS Project - Maintain Existing Report Template in SSRS. - Migration AWS • Responsible to Review, Testing and Assign Development Task. • Responsible to Deploy and Support Deployment in All Envionment. • Responsible to Support All Environment Issues. Tech Stack: .NET 8, C#, SQL Server, PostgreSQL, AWS, JMeter, JIRA, REST.	September 2022 - December 2024
AGUNG SEDAYU GROUP Application Development Staff – North Jakarta, Jakarta • Worked as Backend Developer, building and maintaining RESTful APIs using .NET Core (C#) and MongoDB. • Developed and enhanced backend services for internal land payment applications, supporting business operations. • Performed testing, debugging, and maintenance to ensure application reliability and performance. • Produced technical documentation for system enhancements and newly developed modules. Tech Stack: .Net, C#, MongoDB, GRPC, HTML, Javascript, Azure.	August 2021– August 2022
HIRO SENTRA GLOBAL Programmer in GS Battery – Karawang, Jawa Barat • Develop, bug fix, maintain Web based application write in VB.Net using webform and using SQL Server, Oracle as its database. • Write Documentation of Developed Modul. Data Engineer in GS Battery – Karawang, Jawa Barat • Develop, bug fix, maintain Dashboard using Tableau. • Maintain Dashboard host server in Tableau Server. • Maintain Scheduler and data pipeline for dashboard need. • Write Documentation of Developed Dashboard. Tech Stack: VB.Net, VB, C#, MVC, Tableau Server, Tableau, Tableau Prep, SQL Server, Oracle.	July 2020 – July 2021
XSIS MITRA UTAMA Backend Developer in BFI Finance – Tangerang, Banten • Working closely with Business analyst, quality assurance, release management to deliver sprint as its scheduled. • Develop, bug fix, maintan Salestrax Web Apps based on ASP .Net webform and write in c# and using SQL Server as its database. • Develop, bug fix, maintain AIS Web Apps based on ASP .Net webform and write in c# and using SQL Server as its database. • Develop, bug fix, maintain API developed using .Net Core and write in C# and using SQL Server as its Database for BFI Finance third party clients. • Create, enhance report using SSRS • Help RM to create proxy and listing api in multiple environment for APIGee Tech Stack: VB.Net, VB, C#, MVC, REST, SQL Server, SSRS, APIGee.	May 2018 – May 2020

PERSONAL PROJECTS

1	Project	:	Jobstreet Job's Alert
	Description	:	Develop a scheduled job alert from scrapping data in jobstreet based on keyword that I set and delivered the data to my email in form of excel attachment.
	Stack	:	Python using selenium and BeautifulSoup

COURSES

1	Course	:	Python Programming Track
	Organizer	:	DataCamp
	Cert. Issued	:	March 2022
2	Course	:	Node JS Dasar
	Organizer	:	Codepolitan
	Cert. Issued	:	January 2022
3	Course	:	Web Development Path (Ruby on Rails)
	Organizer	:	Digitalent, Progate
	Cert. Issued	:	September 2021
4	Course	:	Secure Development Lifecycle
	Organizer	:	Cyber Army Indonesia
	Cert. Issued	:	December 2020
4	Course	:	.Net Technical Consultant
	Organizer	:	Xsis Mitra Utama
	Cert. Issued	:	May 2018
